DALLAS, TX
27 August 2012

NUNCHUK® Precision Shafts got off to an impressive start to the 2012 FedExCup Playoffs with a second-place and T24 finishes at The Barclays, which was contested this year on the notoriously challenging Black Course at Bethpage State Park. The second-place finisher climbed 17 spots to the 2nd place on the FedExCup points rankings heading into the Deutsche Bank Championship, the second tournament of FedExCup Playoffs. Adding onto his strong 2012 PGA Tour season, which included a win at the Farmers Insurance Open, a Top 5 finish at The Open Championship and two other Top 10 finishes, the second place finisher is looking to secure one of the remaining spots on the 2012 U.S. Ryder Cup team.

This past week's results demonstrate that NUNCHUK® Precision Shafts continue to perform extremely well on the demanding courses played on the PGA Tour, where control and pinpoint accuracy are essential to scoring well. Since they were first released on the PGA Tour, over 45 PGA Tour players have used NUNCHUK® shafts in competition. In 2012, PGA Tour players with NUNCHUKs® in play have earned nearly \$7 million.

“PGA Tour players demand equipment that will help them perform on the most demanding golf courses, when the pressure is at its highest,” said Arnie Cunningham, NUNCHUK® PGA Tour representative. “When you’re playing on golf courses like The Olympic Club, the Ocean Course at Kiawah Island Resort or the Black Course at Bethpage State Park accuracy is critical. Every week, PGA Tour players tell me that the accuracy and consistency of NUNCHUK® Shafts give them the confidence to just aim and swing - no matter how narrow the fairway or how small the green.”

(more)

“While amateur golfers might not face the same grueling courses that PGA Tour professional see every week, accuracy and consistency are just as important whether you’re playing competitive junior golf tournaments or your regular weekend round,” said Mike McCall, nVentix® Golf CEO. The revolutionary technology in the NUNCHUK’s® patent-pending design allows the exact same shaft to be used by professionals and amateurs, men and women, juniors and seniors – the original NUNCHUK® in their drivers and fairway woods and the new NUNCHUK® 370 in their hybrids. “When you’ve got a NUNCHUK® in your bag, you’re playing EXACTLY what the pros play,” McCall added.

The unique Tri-Zonal Stability™ technology in the NUNCHUK® Precision Shaft and the NUNCHUK® 370 Precision Hybrid Shaft enables golfers of all abilities to more consistently deliver LONG & ACCURATE driver, fairway wood and hybrid shots. Golfers of all ages and swing speeds who play the NUNCHUK® and NUNCHUK® 370 will see their shot dispersion narrow AND their spin rate reduced - thus increasing both accuracy and distance.
